Dear DOH/OSP,

Your conclusion that "Wi-Fi is unlikely to pose a health risk" is based upon a suppression of evidence (omission of the 2013 French Update, 2013 British Columbia Centre for Disease Control report and the 2009 President's Cancer Panel report); is based upon a dilution of the evidence with biased and obsolete reports; and is in direct opposition to the most recent findings of international health organizations (2013 WHO; 2013 French Update, 2013 British Columbia Centre for Disease Control report and the 2009 President's Cancer Panel report).

Please revise your report to include the omitted documents above which conclude that wireless radiation poses a health risk.

I do not want Wi-Fi in our schools – it has not been proven safe. Please protect our children and return our schools to a wired learning environment.

Sincerely,

Erica Swedberg

Mother to one beautiful boy
